

Teaching type	Credit hours(3)	Architectural Drawing and Presentation (2)	course number
face-to-face	pre-requisite 703117		703118
<p>The course gives an opportunity to the student to understand the mechanisms and techniques relating to perspective drawing. This is an introductory course in freehand sketching and manual drafting/design. Students will be taught basic perspective tools, multi-view drawing and dimensioning techniques. For successful completion of this course a comprehensive examination over the use and execution of these techniques will be required.</p>
