

Cybersecurity Program Learning Outcomes

1. Analyze complex cybersecurity problems and apply computing principles and related disciplines to identify appropriate solutions.
2. Design, implement, and evaluate secure computing solutions that meet specified requirements within the context of cybersecurity.
3. Communicate effectively in diverse professional contexts related to cybersecurity.
4. Recognize professional responsibilities and make informed decisions in cybersecurity practices in accordance with legal and ethical principles.
5. Work effectively as a member or leader within specialized or multidisciplinary teams in cybersecurity projects.
6. Apply computer science theories and software development fundamentals to produce secure computing solutions.
