

Educational objectives for the Cybersecurity program:

1. Preparing graduates capable of analyzing and solving complex cybersecurity problems using principles of computing, networking, and cryptography.
2. Enabling graduates to design, implement, and evaluate secure systems that meet institutional requirements and keep pace with evolving cyber threats.
3. Developing communication skills, professional responsibility, and ethical conduct among graduates, while ensuring compliance with relevant cybersecurity laws and policies.
4. Preparing graduates to work effectively within specialized and multidisciplinary teams in cybersecurity projects at both local and international levels.
